EXPERIENCE

University of California

Undergraduate Research Assistant
Los Angeles, CA
Summer 2018

Data analytics and biomolecular research

Developed a model that predicts input sample size using PCR data and linear regression (Python).

Brown University

Student Programmer
Providence, RI
Fall 2017

Software engineering for the School of Professional Studies

Developed a web app, the Virtual Patient Viewer, using Angular.js and MySQL.

EDUCATION

Brown University

Providence, RI

Sc.B. in Applied Math-Computer Science
3.67 GPA

Expected Graduation: Spring 2021

SKILLS

OOP. Web Development. Functional Programming. Java. Javascript. Python. Pandas. AngularJS. NodeJS. SQL. MongoDB. Pyret. Racket.

PROJECTS

RI Maps

A CLI tool and web app using HTML5 Canvas, Javascript, a Java backend, and MySQL. Used concurrent programming for traffic considerations.

We Know Where You Live

A web app using Node.js and Javascript. Uses a geolocation API using RESTful practices and the MEAN stack (MongoDB, Express.js, Angular.js, Node.js)

myMovieList

A fully deployed product that uses Javascript for the front end, Java on the backend, and the frameworks Spark and Freemarker. Coordinated the efforts of a four-member team.

Other Projects: **Tetris**, **Political Candidate Bot**, **Campus Tour Guide**
